

Intended to be an overview of how we're planning to identify leads

Green text = stuff i wrote

Thus far:

1. Professional Development

- a. Benjy and I bought SW 3-ish yrs ago and inherited a customer base of about 30 entities. Gerrit has the list.
- b. These entities are primarily ISDs and equivalents, defined as:
Intermediate School District: Michigan's regional education service agency, sitting between the state and the local districts. Each one covers one or more counties and provides the shared services its member districts can't run alone: special education, career and technical education, professional development, early childhood programs (including Great Start Readiness, Michigan's state pre-K), technology, and business services. They're funded by a regional millage plus state and federal dollars. There are 56. The names vary (ISD, RESA, ESA, ESD, RESD) but they're all the same kind of entity.
- c. Nationally these are called educational service agencies. The association is AESA, which counts roughly 550 agencies across about 45 states. That's the "~500 regional service agencies" figure in your ICP doc. Counts below are from memory and approximate, since states merge and rename these often. AESA's member directory is the source to verify against before building a list.
 - i. **States with a full statewide network**
 - Arkansas: Education Service Cooperatives, 15
 - California: County Offices of Education, 58
 - Colorado: BOCES, about 21
 - Connecticut: Regional Educational Service Centers (RESCs), 6
 - Georgia: RESAs, 16
 - Illinois: Regional Offices of Education, about 35, plus 3 Intermediate Service Centers in suburban Cook County
 - Indiana: Educational Service Centers, 9
 - Iowa: Area Education Agencies (AEAs), 9
 - Kansas: Education Service Centers, about 7
 - Kentucky: Educational Cooperatives, 8
 - Massachusetts: Educational Collaboratives, about 25
 - Michigan: ISDs / RESAs / ESAs, 56
 - Minnesota: Service Cooperatives, 9, plus 4 metro Intermediate Districts
 - Mississippi: RESAs, 6
 - Montana: Regional Education Service Areas, 5

- Nebraska: Educational Service Units (ESUs), 17
- New Jersey: Educational Services Commissions, about 10
- New Mexico: Regional Education Cooperatives, 10
- New York: BOCES, 37
- North Carolina: RESAs, 8
- North Dakota: Regional Education Associations, 7
- Ohio: Educational Service Centers (ESCs), 51
- Oregon: Education Service Districts (ESDs), 19
- Pennsylvania: Intermediate Units (IUs), 29
- South Dakota: Educational Cooperatives, about 14
- Texas: Education Service Centers, 20 (Region 1 through Region 20)
- Utah: Regional Education Service Agencies, 4
- Washington: Educational Service Districts (ESDs), 9
- Wisconsin: CESAs, 12
- Wyoming: BOCES, about 20

a. **States with a partial or narrower version**

- Alabama: 11 Regional Inservice Centers, university-based, PD only
- Alaska: one, the Southeast Regional Resource Center
- Arizona: the 15 County School Superintendent offices fill the role
- Florida: 3 educational consortia serving small rural districts (NEFEC, PAEC, Heartland)
- Maine: about 9 regional Education Service Centers, fairly new
- Missouri: 9 Regional Professional Development Centers, university-based
- Nevada: 3 Regional Professional Development Programs
- New Hampshire: a couple of regional nonprofits (SERESC, North Country Education Services)
- Rhode Island: 3 to 4 regional collaboratives
- South Carolina: about 6 regional education consortia
- Vermont: BOCES authorized by law in 2024, just forming
- West Virginia: its 8 RESAs were dissolved in 2018 and replaced by a few voluntary cooperatives

b. **States with none**

- Delaware, Hawaii, Idaho, Louisiana, Maryland, Oklahoma, Tennessee, Virginia and DC. These are mostly states where districts are county-sized already, or where the state department runs regional offices itself.

- d. **The Arkansas example** - Arkansas has 15 Education Service Cooperatives. This list comes from the statewide directory that the Southwest Arkansas co-op publishes, including the director each one lists. **All the Arkansas entities in this list, and the equivalents for the other states listed above, are our targets for PD customers. That said, for some reason**

sometimes when we ask ai to help us identify the ISDs and equivalents in all states, it comes up w varying answers.

- i. Arch Ford Education Service Cooperative, Plumerville. Director Mark Taylor. <https://www.archford.org/>
 - 1. If you go to the website above and poke around, you can find the names of ppl who work at the ESC and their contact info. The kinda annoying thing is that getting this info varies entity to entity and website to website. But not everyone in the staff directory is created equal, there are certain roles that are more likely to find our PD products interesting and be decision makers (ex. Mark is a decision maker but doesn't come up in the staff directory filtered to Professional Development).

- xv. Wilbur D. Mills Education Service Cooperative, Beebe. Director Brad Horn. <http://www.wilbur.k12.ar.us/>

2. Coaching

- a. Our 1st coaching app customer is/was [LPSS](#) (Lafayette Parish School System, aka On Track by 5 Alliance). LPSS is a CCR&R and they suggested we sell coaching to all the other CCR&Rs and Head Start programs in Louisiana.
 - i. [Each color in this map is a CCR&R and a potential coaching app customer.](#)
 - ii. At the bottom of ^ page, there's quite a bit of contact info that I think we already started using in our marketing outreach. But, similarly to our PD target customers, if you go to each of their websites (ex.

Agenda for Children) and poke around you can find even more contact info:

Stevie Allen .
Operations Manager
Administration/Operations
✉ [View Bio & Contact](#)

Melissa Anthony .
Manager, Early Childhood
Enrollment & Attendance
Early Childhood Programs, NOEEN
✉ [View Bio & Contact](#)

Lorna Bell .
Program Manager,
Observations & Accountability
NOEEN
[View Bio & Contact](#)

Jami'i Bell .
Manager, City Seats Provider
Partnerships
Early Childhood Programs
✉ [View Bio & Contact](#)

Caitlin Boley .
Director, Lead Agency
Operations
Early Childhood Programs, NOEEN
✉ [View Bio & Contact](#)

Marione Breedlove .
Coach, City Seats

Brandy Brown .
Coach, City Seats

Dianna Constant .
Senior Specialist, Professional

Nikki Cousizan .
Chief Financial Officer

Sarah Crawford .
Staff Accountant

- iii.
- iv. And pretty much every state in the US has CCR&Rs, or equivalents. Illinois example , scroll down on website linked here
 - 1. Also potentially relevant?
<https://www.childcareaware.org/resources/state-by-state-resource-map/>
 - b. LPSS also suggested we get in touch w the Louisiana Dept of Education and is actually advocating on our behalf to the LDOE that we become a statewide contract.
 - c. LPSS also suggested that we reach out to the Head Start agencies in the state of Louisiana. And it's a program that's country wide (1,600 agencies country wide). And these entities are awarded grants so keeping an eye on who receives those might be helpful.

Yes. Head Start is a federal program, so it exists in every state, DC, Puerto Rico, the territories, and more than 150 tribal communities. The federal Office of Head Start funds about 1,600 local agencies directly, skipping the states entirely. That's roughly 17,000 centers and around 750,000 funded slots for children from birth to five.

Who the grantees are

- Community action agencies and other nonprofits, the largest group
- School districts and county school systems
- City and county governments
- Tribal governments
- Large multi-state operators, like Save the Children, which showed up in your Louisiana list

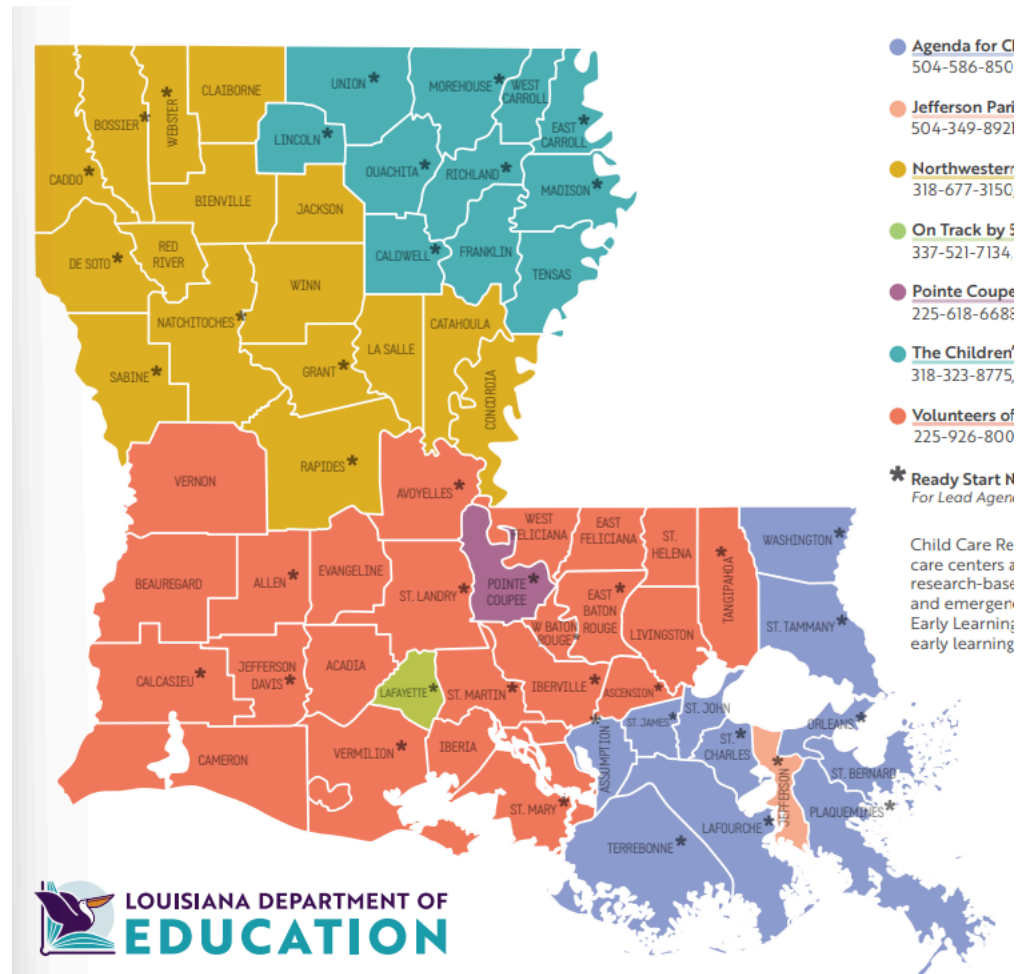

What makes them a clean segment for you

- One national rulebook. The coaching requirement Emmy was pointing at is in the federal performance standards, so the need is identical in all 50 states. Practice-Based Coaching is the model the Office of Head Start itself trains on, and CLASS is the observation tool used in federal monitoring. Both are already in the app.
- One national list. The federal locator at headstart.gov lists every grantee and center with contact info, and it's filterable by state. There's no state-by-state hunting like there is for CCR&Rs.
- A built-in network. Every state has a Head Start association and a State Collaboration Office, there are 12 federal regions each with its own association, and the National Head Start Association runs the big annual conference. Same reference-driven dynamic as the Louisiana CCR&Rs.
- Federal money on a five-year grant cycle, with training and technical assistance dollars earmarked inside every grant. That's the budget line coaching software would come out of.

i.

3. Referrals and Enrollments

- a. After LPSS saw our coaching app and absolutely loved it, they asked if we could make 2 more apps "Referrals" and "Enrollments". The customers of these apps are each county ("parish" in LA for some reason) in each state's version of this map, across the US. So in LA, there's 65 potential Referrals and Enrollments customers (130 total contracts, if they buy both apps).
 - i. Benjy said referrals are actually just CCR&R opportunities?

ii.

4. Concluding thoughts

- a. In an ideal world, each county in the US is using our Referrals and Enrollments products. Each ISD or equivalent (state by state) is using our PD product. And each CCR&R or equivalent is using our Coaching product.
 - i. And in a really ideal world is each State (or the USA) dept of education is mandating that our Referrals, Enrollments, and Coaching apps be used and we have higher level contracts w Louisiana and Illinois individually, or the US DOE.
